

# ProTeus IV

*The CMMS Technology Leader*

*for Healthcare*

ProTeus IV for Healthcare, a leading Computerized Maintenance Management System (CMMS) for the healthcare industry, addresses the specific needs and challenges that healthcare facilities face today. The software generates reports that meet JCAHO standards for equipment maintenance, and reduces costs by streamlining maintenance operations. ProTeus IV has been used with great success in hospitals, medical laboratories, nursing homes and other healthcare organizations in the United States and around the world.

Benefits Include:

- Increased equipment availability
- Decreased operating costs
- Reduction in inventory investment
- Improved cost history tracking
- Extended equipment life
- Automated interface with Building Automation Systems (BAS) for more efficient equipment maintenance
- Decreased paperwork due to PDA paperless work order processing
- Increased maintenance staff productivity
- Improved documentation and accessibility to information
- Simplified maintenance data reporting
- Easier compliance with regulatory requirements

## Cost Savings

Customers report significant cost savings in the areas of equipment, labor and inventory.

### Equipment

Since regular preventive maintenance is proven to extend facility and equipment life through fewer equipment breakdowns, Eagle customers report a 10-15% reduction in maintenance costs after implementation. Plus, by analyzing expenses and repair histories for individual pieces of equipment, repair/replace decisions are easier to make.

### Labor

ProTeus IV scheduling can help plan your maintenance staff's workload efficiently. As a result, overtime is reduced, and critical equipment response time is optimized. In addition, ProTeus IV minimizes traditional

paper work, freeing employees for more productive work.

### Inventory

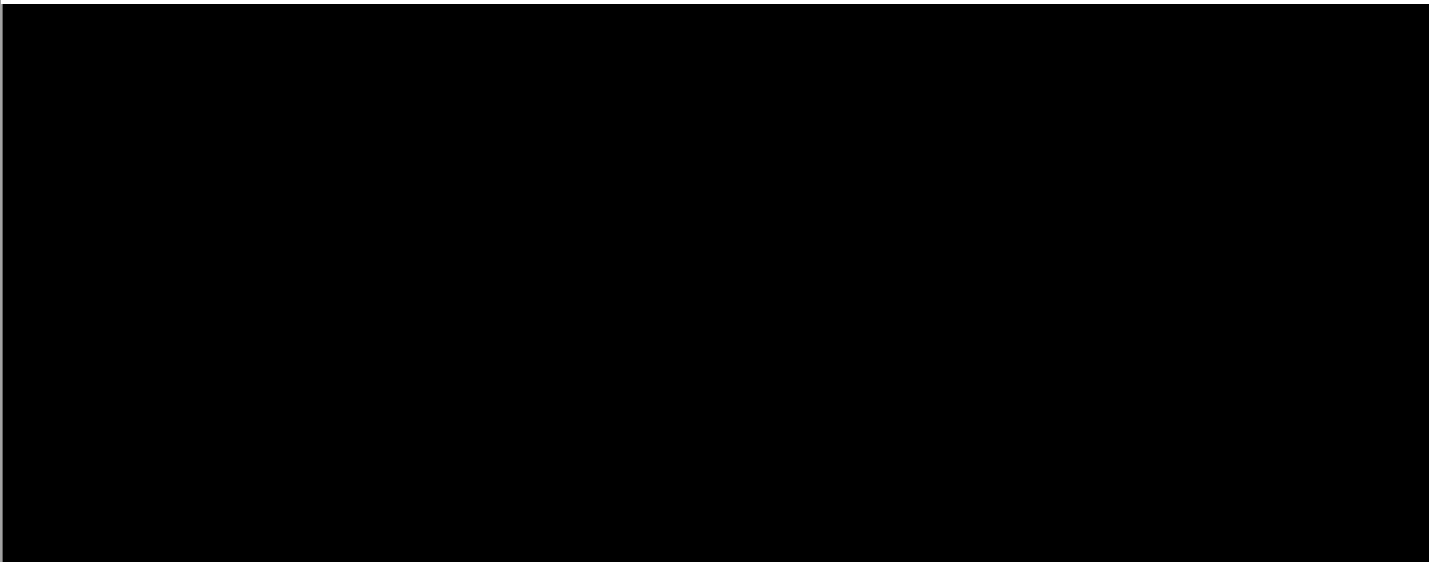

Experts estimate that most maintenance departments keep 20-30% too much capital tied up in spare parts inventories. The comprehensive inventory management functions in ProTeus IV help your maintenance department manage inventory levels more efficiently.

# ProTeus for Healthcare

Your facility's HVAC (heating, ventilation and air conditioning) equipment is an important line of defense against airborne infections. Properly planned and executed preventive maintenance on this HVAC equipment decreases the chance of critical equipment breakdowns and emergency repairs. Implementing ProTeus IV has improved the uptime of many of our customers' equipment by 10-20%.

If you're looking to meet or maintain JCAHO standards, ProTeus IV offers many reports which are accepted by JCAHO as proof of compliance.

JCAHO Standard	How Eagle Technology's ProTeus IV Can Help
	

ProTeus IV for Healthcare is the best way to protect your patients' comfort and safety, prepare for JCAHO surveys, maintain vital equipment, and improve maintenance operations.
