

ProTeus IV

The CMMS Technology Leader

Barcode

The ProTeus Barcode Module makes it easy to barcode and track your equipment, inventory, employees, and work orders. By barcoding your work orders, collecting information on PM and DM work orders is a breeze. Using the barcode scanner, you can also:

- Update equipment runtime
- Adjust physical inventory
- Update tasks, parts & labor on PM work orders
- Update tasks, parts, labor & causes on DM work orders

This information can then be easily uploaded into the ProTeus database.

Features

- The Barcode Module is a cost-effective way to reduce data entry time!
- Visit our web site for a complete slideshow presentation of the Barcode module. Visit www.eaglecmms.com.
