

Data Conversion/Data Import

Converting your current data provides a smooth transition to your new software.

- **Data Conversion** (when upgrading between ProTeus systems)

Upgrading between ProTeus systems is fast and easy! Send us a copy of your database, and Eagle will convert your data from one ProTeus system to another.

- **Data Conversion** (when upgrading from WEMM/MM to ProTeus II)

Should you be upgrading from our earlier WEMM or Maintenance Manager software, we can convert your data for only a small fee. History records older than 6 months are typically archived. An archived data "viewer" is included at no cost.

- **Data Import** (from non-Eagle products to ProTeus II)

Populating your new ProTeus II database is simple if you have previous data saved in an Excel spreadsheet, Access database, ASCII file or other legacy system. In fact, we can import data from most spreadsheets and databases.

Data Conversion is available from older Eagle products, competitive products.

Data Import is available from Excel spreadsheets, Access databases, ASCII files.

Learn more about our Data Conversion services at our web site. Visit www.eaglecmms.com/support.

Own a competitor's product? Eagle's inexpensive **XTRACT Database Upgrade Service** will convert much of your existing data from your current CMMS to ProTeus II CMMS. Our fast turn-around times make it that much easier for you to make the switch!

Turnaround time depends on the quality of the data and the size of the database. Typically, databases smaller than 50 MB can be converted in less than 5 days. Allow additional time if a database is over 50 MB. After conversion, thorough testing is performed to ensure data integrity.
