

ProTeus IV

The CMMS Technology Leader

MS Project® Interface

The Microsoft Project interface allows Eagle customers to transfer Project information to ProTeus.

Using Project's unique planning tools, users can schedule long-term or complex projects, then export the individual tasks to ProTeus for maintenance work order scheduling.

Downtime estimates and job names are automatically transferred to ProTeus, and tasks on Project's critical path are given a 'critical' priority in ProTeus, thus ensuring their completion for on-time Project fulfillment.

Features

- Easy transfer of project data from MS Project to ProTeus
- Turn complex MS Projects into step-by-step tasks in ProTeus
- Visit our web site for more information on the MS Project Interface
